

The HomePlace Way

The HomePlace Way is the cornerstone of who we are.

Where people living with disability can take their rightful place at the heart of community—living big, rich lives filled with purpose, joy, connections, and opportunities.

The impact of the HomePlace Way can be seen in the achievements of each person that we support. Achievements that come from:

- Putting the person-first—always
- Fostering respect, kindness, and safety, together
- Working with passionate staff with years of experience supporting people living with intellectual disability and other disabilities
- Expanding roles, maintaining skills, and building relationships for and with each person at home and in their communities
